Prospect of Development of a Coal Field to Supply Fuel Enough for a Large Territory.

How the Work is Being Earnestly Pushed Forward.—Pluck and Enterprise Not Wanting.

Correspondence of the Gazette.

MONTAGUE, TEX., Dec. 4.—Your Montague correspondent on yesterday resolved to correspond on yesterday resolved to a whole day in the interest of the readers of THE GAZETTE.

It is not to be wondered at that most Americans are dyspeptics. Swallowing ice-cold drinks on a hot summer day does the mischief. Why then not add ten drops of Angostura Bitters, the world-renowned tonic of exquisite flavor, and thus avoid all danger of cold in the stomach?

Warning!
enterprise, professed little, if any, more than ordinary means of judging of its merits. He says that before commencing his experiment, as a preparation he visited other mines in successful and profitable operation for the express purpose of enlightening himself upon the subject, and after a careful comparison and without practical knowledge of anything connected with the work, except hard labor, he has made the venture and will continue until success or failure is assured by the experiment. He has in his employ, however, three practical and experienced coal diggers, one of whom is his neighbor, whom he has long known, and they are even more sanguine than himself.

New York, Dec. 5.—The latest

news from the church on Saturday morning was made public by Bishop Borger pronouncing a curse of interdiction against all members of the scandalous conduct of the church.

There were shots on the entire congregation from all privileges of the church.

No sacraments celebrated, and the church is outlawed. This dis-

tinguishable rare case, having been pro-

hibited a dozen times during

the Christian era.

ters in the United States. It is just
